

THE BULLETIN, Bolivar, Tenn.

G. W. ARMISTEAD, Editor & Prop'r.

THURSDAY, MAY 12, 1881.

CIRCULAR ADDRESS.

Valuable Lands for Sale Cheap in West Tennessee—Read and See for Yourself.

Office of F. WILLIAMS, Land Agent, Bolivar, Hardeman County, West Tennessee.

To Emigrants, Home-Seekers and Others.

Allow me to call your attention to some facts respecting this portion of Tennessee, and especially Hardeman County, where any one who desires can find a home or investment among us. It is to the county of Hardeman that we wish to call your special attention. By referring to the map of Tennessee, you will see that this county is situated in the western portion of the State, and that the Big Hatchie river, together with a number of bold, fresh creeks, passes through this county. There are also numerous small creeks and springs scattered all over the county, and good water can be obtained anywhere by digging from 20 to 60 feet, owing to locality. Along these streams, as well as on the hills, timber of various kinds grows in abundance, where it has not been cleared away for farming purposes. The lands in Hardeman county consist in bottom and uplands, like the most of the West Tennessee country. A great deal of the land has been cleared and cultivated for years previous to the war, but since that time thousands of acres of our best lands have remained idle on account of the scarcity of laborers to cultivate them. These lands are still very productive where they have been kept from washing, which does not require much labor. Upon these lands are grown fruits, vegetables, cotton, corn, wheat, oats, rye, potatoes, and numerous varieties of grasses, and especially clover and Lucerne, which grow in the greatest luxuriance in this soil, not being surpassed by any other State in the South. But these lands are better adapted to the raising of cotton and corn than for any other crop, and consequently these form the principal products of this section of the State. It makes no difference about the variations in the season; this crop never fails, and when it is made and gathered there is always a ready market for it. This county has as many as ten or twelve little towns in it, and two railroads pass through it—the Chicago, St. Louis and New Orleans railroad, which runs through it from north to south, and the Memphis & Charleston road, which runs along the southern border, and any produce that is raised can be transported with all ease and rapidity to the best markets in the United States. Besides, the Hatchie river is navigable from its mouth, where it empties into the Mississippi, near Memphis, up to Bolivar, the county seat of this county, a distance of 350 miles. Steamboats with a capacity for carrying from a thousand to fifteen hundred bales of cotton run up the river to Bolivar, from Memphis and New Orleans, as well as various other points, during all the winter, and in a year or two the river will be put in such a condition that the boats can run at all times with the greatest ease. This steamboat business comes in competition with the railroads, and forces them to transport your produce to market at reasonable rates.

This county has a population of about 23,000, and since the war a great many of the people have been allured away from their comfortable homes by visions of an Eldorado in the far West. Not finding what they were seeking, some of them have returned, and others who were more unfortunate, have either died or are too poor to get back. The climate of this county is excellent, and is healthful, as a general thing. The country does not consist of low wastes and marshy lands, but of rich, productive lands, and lands, too, that will rapidly advance in the market beyond your expectation. It is this locality we wish to offer to emigrants and all others, an inducement that will certainly meet with their approval. You may hear some say that this is an old, worn out country, and that it was good once, but is no longer so; but when they tell you this they don't know anything about it, and we only ask you to investigate the matter and see for yourself. This country has never been advertised, and the consequence is that people are continually passing through our State on their way to Arkansas or Texas, where the railroads and speculators hold out all sorts of signs and misrepresentations to induce them to go. They are actually passing through a country that will suit them much better than the one to which they are going, but they do not know it, and do not find it out until it is too late. We have plenty of good agricultural lands and plenty of timber of almost any kind that a person would want. There are numerous springs and creeks all over the county. One of the most attractive places in the county is the Dunlap Springs, which are situated about three miles south of Bolivar, on Spring creek. These springs are composed of several different kinds of water—

chalybeate, sulphur and arsenic—and are noted for the mineral qualities they possess. The waters have been tested by competent judges, and pronounced to be as fine as any waters of the kind in the State. Previous to the war these springs were nicely kept, and visitors from all parts of the country went there to spend the summer. All that is needed now is improvement in the way of building, to make this one of the most popular summer resorts in the State. These springs are for sale, and can be bought on reasonable terms.

The agricultural lands of the county grow cotton, corn, sorghum, wheat, oats, vegetables and fruits or various kinds equal to the lands of Indiana, Illinois, and North Georgia. The climate here is mild. Wild grasses grow very well, and on this account the country is well adapted to raising cattle, sheep, mules, hogs or goats. With a little attention through the winter for two or three months, stock can be raised here as well as in any country at the South. We have open and for sale to actual settlers or any one wishing to invest, any quantity of land, improved and unimproved, cleared and not cleared. We can sell you a good farm, as small or as large as you may wish it. We can sell you land as cheap as you would want it, and as dear. We can sell you land on one and two years' credit, and some we will sell and allow the purchaser as long a time as he wants to pay for it. The lands in this county sell and can be bought from three dollars per acre up to as high as twenty-five dollars. You can buy very good farming lands from three to ten dollars per acre on time.

Crops here last year were very good, and the prospects for a crop this year are all that could be desired. Men with capital can find good openings to engage in business, or for buying lands. Bolivar, the county seat of Hardeman county, is situated on the Hatchie river, at the head of navigation. It is a pretty town, and the inhabitants number about 1200. There is quite a number of little towns throughout the county, all flourishing and good points for business, most of them being located on one or the other of the two railroads which pass through the county. We need good, industrious working men here to make this State equal to any State in the South in its soil and productiveness. The climate is good, and there never has been known a time since it was first settled that there has been a failure in crops. In this respect this country surpasses almost any other, and especially the Western States, where frequently they do not raise more than one crop out of three.

It is fully for a man who wants a nice home and a good country to live in, to go West and find it all a notion, which time will prove. This is the country to settle in, if you want to live in a good and civilized land. This is the country where the free school system is getting better and better every year, and any one can give their children a good education who chooses to do so. The society all over the county is good. We have good schools and churches, and there is not a child in this county but what has the advantages of a good education. There are churches throughout the entire county, of nearly all denominations excepting Roman Catholics. People from all the States, as well as foreigners, will be welcome, and will be treated well here.

There is not now much quarreling over politics. The last Legislature, which has just adjourned, fixed upon a plan and passed a law to settle our State debt, and levied a tax which will not be burdensome to any taxpayer. As it is now, after this extra tax is upon us, we pay less taxes than Kentucky, Alabama, Louisiana, Arkansas, and a number of other States in the South. Besides, we have never repudiated a single, solitary cent of our public debt. It makes no difference here where a man is from, or what his religion and politics are, so he is a man among men, and will go to work and make a good citizen. Any one who may see this circular, and are desirous to inquire further into the particulars of the country, will address a letter to

F. WILLIAMS, ATT'Y AT LAW AND LAND AGENT, Bolivar, Hardeman Co., Tenn. We have quite a number of farms on hand for sale, and if you wish to invest write us what kind of a farm you would like to buy, and we will send you full particulars, location, etc.

After reading this circular, if you do not feel interested in this section of the country, hand or send it to some of your friends who are thinking about emigrating. We refer to the postmaster at this place, and the business men throughout the county. We publish this circular at the solicitation of a number of land-owners in this county, who have more land than they know what to do with, and who are willing to offer the fairest inducements to get people to come and settle here, either to buy, lease or rent. Address all communications to F. WILLIAMS, Bolivar, Tenn. Att'y at Law.

"Out of Work." And sick with no kidneys for years," wrote Mr. Alexander Ferris, of Cheating, N.Y., recently. He used Warner's Safe Kidney and Liver Cure. Now he says, "I cheerfully recommend it to all persons suffering in the same way."

Science in Court. "Do you plead guilty, or not guilty?" asked the Judge, addressing Simms. "I choose to plead at all. I don't pay lawyer. You can't catch me with yer pinks."

"Look out, you impudent rascal. Are you guilty or not guilty?" "Now yer's getting at de facts. I has de honor ter state dat I is not guilty."

"Yes he is, Judge," exclaimed Cobb. "He hit me in de mouth wid his fist." "I never tech de man."

"Didn't you hit him in de mouth?" asked the Judge. "No, sir, I didn't put my hand on him. In fact, never tech him."

"Judge, I swear on de biggest Bible dat he hit me."

"No, I don't believe yer did."

"Now, An'ny, ez a student, an' a man ob science, didn't yer run agin a post an' knock dem teeth out?"

"Viewing this subject in a scientific light, I believe I did."

"An' now, An'ny, as a student an' a learned man, won't yer withdraw dis case pending agin me, in which yer is de scientific plaintiff, an' in what I is de scientific defendant?"

THE MARKETS. NEW YORK May 10, 1881. CATTLE—Native Steers \$7.00 to \$8.00. SHEEP—Native \$4.00 to \$5.00. HOGS—Live \$4.00 to \$5.00. FLOUR—No. 1 \$2.00 to \$2.50. WHEAT—No. 1 \$1.00 to \$1.50. CORN—No. 1 \$0.50 to \$0.75. RICE—No. 1 \$0.25 to \$0.50. SUGAR—No. 1 \$0.10 to \$0.20. COFFEE—No. 1 \$0.05 to \$0.10. TEA—No. 1 \$0.01 to \$0.05. SPICES—No. 1 \$0.01 to \$0.05.
